Projects

MyFlix Movie App | Career Foundry Course Assignment | 07/2021

Developed a server and client side using MERN tech stack. App generates a list of movies from the database. Users can register, login, view more information and make a list of favorite movies.

Meet App | Career Foundry Course Assignment | 06/2021

Built a serverless, progressive web application with React and AWS serverless. Implemented a test-driven development approach. The app fetches upcoming web development events from Google calendar API.

Education

Full-Stack Web Development Immersion Course | 02/2021-11/2021
CareerFoundry, Online

MA International Business Management | 09/2013-09/2014
University of Greenwich, London, UK
Diploma with distinction
